

Katherine Wynn captures beauty

When she came to Florida, Katherine Wynn's grandfather changed the path her life took by bequeathing her an old Minolta camera. Because of this gift, she took classes in black and white photography and learned the secrets of the dark room. Thus, Katherine's passion began; in her own words, she celebrates life through captured moments in Southwest Florida. She specializes in shooting adorable kids, beautiful weddings, happy families, the coolest seniors and the latest rock bands.

Those are all her words. What you need to understand is that Katherine's passion allows her to see in her camera's lens a moment of beauty in every shot she takes, a moment that maybe you and I cannot see. That is the innate gift of this photographer. She says she aims to capture the personality of her clients; she does, so trust her. Kats Eye Photography, KEP, is located in downtown Punta Gorda in the Ice House, a building that at one time stored blocks of ice. Here, Katherine has a wonderful loft, with all her magic at her fingertips. She plays with technology that encompasses her photography and computer expertise. The results are unique, beautiful and memorable, all the qualities and reasons for taking a picture in the first place. Katherine Wynn offers portrait photography, weddings, baby and family settings. Pets and custom bags, jewelry with a touch of photography, custom framing, albums created in a very unusual presentation, photo books, coffee table books photographs that are just a shade different.

Kats Eye Photography does not forget the community; in 2009, Katherine helped the PPA Charities to benefit Operation Smile, and the Charlotte County Animal Welfare League, offering clients a complimentary pet portrait in exchange for a donation to AWL. You have to visit Kats Eye Photography and learn about Katherine's wide range of skills and her overriding passion. Talk with her about your dreams, be it a wedding photo or a portrait of your new born baby.
